

## What is JV-Campus?

JV-Campus is an international education platform project of the Japan Forum for Internationalization of Universities (JFIU), established under the initiative of the Ministry of Education, Culture, Sports, Science and Technology (MEXT).

As a gateway to Japanese higher education, we provide a diverse and compelling range of educational content worldwide, and our core vision is to “build a new relationship where students and educators weave the threads of wisdom into a fabric of knowledge together.”

At present, in addition to Japanese universities, we also have the participation of industry and overseas educational institutions.
